SKILLS

Languages/Web - Python, Javascript, Ruby, HTML/CSS
Frameworks - React, Ruby On Rails, NodeJs
Databases - SQL, NoSQL, ElasticSearch
AWS - Aurora, DynamoDB, Lambda, EC2, ELB, KMS, IAM
Google - Firebase, Firestore, Cloud Functions
Other - Git, CircleCI, Serverless, Heroku, Jira

EXPERIENCE

Fluent Inc.

Software Developer

Emtech Intern

New York City
May 2019 - Nov 2019
Jan 2019 - May 2019

- Debug and implemented administrator features on React/Firebase application
- Collaborated with Data Engineers to re-architect, build and maintain reporting tools for seamless internal decisions and reduction in support tickets
- Logged database procedures for prompt reactions during source data failures
- Updated legacy Python code to Serverless AWS Lambdas, abstracted tightly coupled concepts to remove crashes and reliably provide data/logs for Analytics
- Integrated concurrency for Node application ingestion requests to offer quasi real-time updates for multi-feed revenue opportunities
- Migrated text search application from MySQL database to Elasticsearch cluster and increased search performance from seconds to milliseconds

PROJECTS

NYC-List

Project to display data from NYC Open Data utilizing React, Flask and the SodaPy package

[Github](#)

Portfolio Reporter

Python AWS Lambda that reports on a given portfolio daily with a simple Serverless deployment template
